To Whom It May Concern:

Mountain Valley Stone (M/043/019, Operator Robert Hicken) would like to amend its current Mine Permit. We would like to add the acreage that is in the Life of Mine plan to our 5 year plan. We are currently growing a little faster than we anticipated.

The 4 acres in the south east corner of lot 37 is the area that we want to put into our 5 year plan. The area will be used for top soil storage and production and processing. It was included in the Life of mine plan.

We will be moving 3 guillotines to that area as part of production and processing. The top soil storage will be placed parallel to the boundaries of the adjacent quarry to the North East of us as a buffer and another section of top soil will be placed parallel to Browns Canyon Road to limit disturbance and create a buffer there as well.

We have also made a few other changes that are included on this map. DC Transport is now crushing our overburden full time. Since they have been there we have moved some sand and gravel piles and have built them an access road. We have built a permanent road between us and the adjacent quarry as a buffer. Also we have expanded the storage area in the South East corner and added a well were the access road split.

These are the changes that we have made and would like to make in the future. If you have any questions please call me.

Sincerely,

Brad Young

Heber City, Utah 84032

Dear Mr. Hicken:

We are responding to your consultant's request for an approved jurisdictional determination for the Mountain Valley Stone site. This approximately 126-acre site is located adjacent to Lost Creek in Sections 19 and 20, Township 1 South, Range 5 East, SLB&M, Latitude 040° 42' 55.9", Longitude 111° 24' 42.3", east of Park City, Summit County, Utah.

Based on available information and a November 8, 2005, site visit conducted by Jason Gipson of this office, we concur with the estimate of waters of the United States, as depicted on the enclosed drawing, **November 7, 2005, Mountain Valley Stone, Brown Canyon Quarry Wetland Delineation**, prepared by **Harriet Whitson of Wise Earth**. Approximately 3.28 acres of waters of the United States, including wetlands, are present within the survey area. These waters include 2.62 acres of springs and their associated wetlands, 2,394 linear feet of a perennial drainage (Lost Creek), and 7,272 linear feet of intermittent drainages. These waters are regulated under Section 404 of the Clean Water Act since they are tributary, and adjacent to a tributary, to the Weber River.

This verification is valid for five years from the date of this letter, unless new information warrants revision of the determination before the expiration date. A *Notification of Administrative Appeal Options and Process and Request for Appeal* form is enclosed. If you wish to appeal this approved jurisdictional determination, please follow the procedures on the form. You should provide a copy of this letter and notice to all other affected parties, including any individual who has an identifiable and substantial legal interest in the property.

This determination has been conducted to identify the limits of Corps of Engineers' Clean Water Act jurisdiction for the particular site identified in this request. This determination may not be valid for the wetland conservation provisions of the Food Security Act of 1985. If you or your tenant are USDA program participants, or anticipate participation in USDA programs, you should request a certified wetland determination from the local office of the Natural Resources Conservation Service, prior to starting work.

RECEIVED

JAN 20 2006

DIV. OF OIL, GAS & MINING

Under Section 404 of the Clean Water Act, a Department of the Army permit is required prior to discharging dredged or fill materials into waters of the United States. The type of permit required will depend on a number of factors, including the type and amount of waters affected by the discharge. For more information on how to obtain a permit from our office, please visit our website at <http://www.spk.usace.army.mil/regulatory.html>.

Please refer to identification number 200550597 in any correspondence concerning this project. If you have any questions, please contact Jason Gipson at the Utah Regulatory Office, 533 West 2600 South, Suite 150, Bountiful, Utah 84010-7744, email jason.a.gipson@usace.army.mil, or telephone 801-295-8380, extension 22.

Sincerely,

Shawn Zinszer
Chief, Intermountain Regulatory Section
